# ABOUT LUNDAGER

Explore LUNDAGER where quality grows with care.

As a leading plant nursery, we are committed to growing beautiful plants while continuously improving our way to work. Guided by strong values and a dedication to progress, we focus on thoughtful growing practices and reliable quality.

Our innovative approach ensures a diverse range of plants tailored to meet your evolving needs.

At LUNDAGER, your success is most important to us. Through dependable service and a customer-focused mindset, we help your business development.

Join us in growing more than plants – grow partnerships, innovation, and a more responsible future.

## Our Values

# BIOLOGICAL PLANT PROTECTION PROGRAM AT LUNDAGER A/S

At Lundager A/S, we've established a proactive biological plant protection program specifically tailored for ornamental plants.

This program primarily focuses on the management of the most common pests - thrips, aphids, mealybugs and Duponchelia larvae.

While these are the usual culprits, we're also prepared to tackle other arthropod pests as they arise, employing biocontrol organisms to maintain the health and integrity of our crops.

## Innovative Use of Beneficial Insects and Microorganisms

**Hypoaspis System** Our approach includes the strategic use of the Hypoaspis system. This method targets fungus gnats and Duponchelia Larvae through the introduction of natural predators, applied in a timely manner to ensure continuous protection.

**Nemacarp System** Incorporating a blend of Nematodes and Steinernema Carpocapsae, the Nemacarp system is meticulously applied as a drench in new production areas and in plant varieties susceptible to Duponchelia Ovealis larvae, providing an essential shield against these pests.

**Turex** When Duponchelia larvae are detected, we turn to Turex - a biological product that contains Bacillus thuringiensis, renowned for its efficacy in targeting these specific larvae.

**Amblyseius Cucumeris** This predatory mite is a crucial ally in our fight against thrips. We distribute it methodically across various plant varieties to ensure effective control.

**Yellow Sticky Traps** For the mass trapping of thrips, whiteflies, and sciarids, we employ yellow sticky traps (10x22 cm), which can be combined with roller traps for enhanced effectiveness.

**Orius Majusculus** Released in designated areas, Orius Majusculus plays a vital role in our thrips prevention strategy.

**Aphidius-Colemani** A reliable agent in aphid control, Aphidius-Colemani is consistently utilized to keep aphid populations in check.

**Cryptolaemus Ladybird** is our response to mealybug infestations, proving to be an effective natural solution.

## Commitment to Pesticide Free Cultivation

Our commitment to a pesticide free cultivation environment underscores our dedication to natural balance. By eschewing chemical pesticides, we rely on nature's own mechanisms to foster a harmonious ecosystem within our ornamentals.

## Residue Implications in Plants

The presence of natural residues in our plants is a testament to the success of our biological plant protection program. Far from being a cause for concern, these residues signify a thriving interaction between our plants and beneficial organisms.

They reflect the life stages of these organisms, contributing to the overall health of the ecosystem and exemplifying the delicate balance achieved through our biological methods.

LUNDAGER was founded in 1985 in Western Jutland, Denmark, by its current owner, Ove Lundager. Since then, our company has evolved significantly. After relocating to Odense in 2004, we continued to grow. In 2016, we began designing our own ceramics and selling customized, added-value concepts. In September 2022, we acquired the brand TINGDAL. Annually, we produce 25 million mini plants and 6 million larger plants, covering a vast area of 120,000 square meters. Green plants, succulents, cacti, and flowers enhance life quality, purify the air, and create aesthetically pleasing moments. With over 500 varieties in our product range, we aim to bring all the above to our customers. Our vision is to be Europe's preferred supplier of mini green plants, reflecting our commitment to:

Improvement  
for Environment

Sustainable  
Efforts

Innovation

High Quality  
and Service

Customer  
Value Creation
